EDUCATION

Kathmandu BernHardt College — Bafal, kathmandu

Bachelor of Computer Application (BCA) — *Expected Graduation, June 2026*

Running (Final year)

PROFILE SUMMARY

I'm a motivated and detail-oriented frontend developer with a growing passion for creating clean, responsive, and visually appealing websites. I enjoy turning ideas into interactive designs that are both functional and user-friendly. I'm eager to keep learning, take on real-world challenges, and contribute to projects that help me grow while adding value to the team.

PROJECTS

1. **Online News Magazine**

   Tools: HTML, CSS, PHP, JS, JQuery

   A full-stack web application with admin panel and user panel.

   Responsibilities:

   - **CRUD Functionality:** Manage news articles and categories (create, read, update, delete)
   - **User Authentication & Sessions:** Secure login with encrypted passwords and session management
   - **Admin & Client Interfaces:** Separate dashboards for administrators and users
   - **Form Handling & Validation:** Client-side validation with jQuery and server-side validation for security
   - **Responsive & Modern UI:** Mobile-friendly layout using Bootstrap and SB Admin 2 theme
   - **Interactive Elements:** Menus and icons using MetisMenu and Font Awesome
   - **Object-Oriented Code Structure:** Clean, modular, and reusable code design
   - **Database Integration & Security:** MySQL connection, credential verification, and dynamic content management

2. TrashTrack – Smart Waste Management System

Tools: HTML, CSS, JQuery, ASP.NET Core MVC, SQL Server
TrashTrack bridges the communication gap between citizens and municipalities by digitizing waste collection schedules, complaint systems, and admin controls. Designed with security and scalability in mind, the platform ensures that each user role — citizen, ward head, or admin — gets a tailored experience.

Responsibilities:

- **Role-Based Authentication:** Secured login functionality with Role-Based Access Control (User, Ward Head, Admin) using ASP.NET Identity
- **User Dashboard:** Display the garbage collection schedule for each day and every week, according to the ward allocated to the user
- **Complaint Management System:** Enable users to enter complaints regarding missed garbage collections with automatic ward assignment
- **Complaint Tracking:** The ability for customers to track the status of their complaint (Pending or Resolved) in real-time
- **Admin Dashboard:** Provides an overview of system statistics, user activity, and complaints.
- **Pickup Schedule management:** Schedule and edit waste pickup schedules for all wards, overriding holidays or emergency conditions
- **Complaint Review & Resolution:** Evaluate customer-submitted complaints for their complaint resolution statuses
- **User Management:** User registration, allocation of a particular ward, and locking or unlocking the account under the admin's control
- **Secure System Design:** Restricted Public Access with Controlled Registration and Authentication Processes

3. Otaku Oasis: Anime recommendation system

Tools: HTML, CSS, JS, PHP

A full featured anime recommendation system with admin and user interface.

Responsibilities:

- **CRUD Functionality:** Manage anime posts, genres, sources, studios, and producers (create, read, update, delete)
- **Recommendation System:** Suggest similar anime titles dynamically based on shared genres
- **Real-Time Search:** Instantly find anime using AJAX-based live search without page reloads
- **Wishlist Feature:** Add or remove anime from wishlist with immediate visual updates
- **Responsive & Modern UI**: Mobile-friendly design using Bootstrap, Font Awesome, and SB Admin 2 theme
- **Dynamic Sorting & Filtering:** Display featured, recent, and slider anime sections automatically by date
- **User Authentication & Sessions:** Secure login system with encrypted credentials and active session handling
- **Object-Oriented Architecture:** PHP OOP structure ensures maintainability and modular code organization
- **Database Integration:** Efficient MySQL queries for managing relationships between anime, genres, and studios

- **Interactive User Experience:** Smooth interface transitions, modals, and alert messages for better engagement

ACADEMIC ACHEIVEMENTS

- **BernHack 2025: Intra College Hackathon 1st runner up**.

SKILLS

- **Programming Languages**: JavaScript, HTML/CSS, PHP,
- **Tools & Frameworks:** Tailwind CSS, WordPress
- **Soft Skills:** Problem-solving, Team Collaboration, Time Management, Critical Thinking.

HOBBIES

- Playing Chess
- Coding and web designs
